Product Verification/Evaluation Facility

The Consolidated Automated Support System

Product Verification/Evaluation Facility

The Consolidated Automated Support System Product Verification/Evaluation Facility provides the means to perform single site testing on the CASS hardware and associated Test Program Sets (TPS). It contains the resources to perform RDT&E, TECHEVAL and OPEVAL testing on all aspects of the CASS development, including lifecycle and P³I testing. The facility combines the Class Desk, Test Engineer, Development Contractor and Military User into a cohesive team focused on the development of the various assets of CASS.

The Consolidated Automated Support System

Capabilities:

- Contains all the different CASS configurations and ancillary hardware
- Contains all versions of CASS software
- Contains all supporting test instrumentation to conduct test and evaluations of newly developed hardware/software
- Provides the resources to conduct engineering investigations of the CASS subsystems
- Contains the resources to conduct TECHEVAL of newly developed CASS Hardware and Software
- Contains the resources to perform TECHEVAL on newly developed CASS TPS
- Performs all lifecycle and P³I testing.
- Support CASS Class Desk in initiating, developing and administrating new CASS initiatives

Major Programs Supported:

- Consolidated Automated Support System
- F-14A/B/D
- F-18C/D, E/F
- EA-6B
- SH-60B/F
- S-3A
- AV-8B

Major Equipment Assets:

- CASS Hybrid Test Station
- RF CASS Test Station (2ea.)
- CNI CASS Test Station (2ea.)
- CASS Pneumatic Function Generator
- CASS Video Pattern Generator
- MicroVax Work Station
